# COMPANY ABOUT US

PCustom was born from a team of professionals with heterogeneous and complementary skills: thanks to the experts, who are part of it today, the company can rely on many years of experience in woodworking, particularly solid wood, and thirty years of experience in the furniture industry.

The strong **passion**, rooted over the years, is the main engine of the company that designs **"Made in Italy" products**, a value that becomes increasingly rare and precious, in the era of globalization.

Over the years, **PCustom** company has distinguished itself through its fine production of tables, semi-finished wood products, furniture components, upholstered furniture and other custom-made solutions for **home, office and high quality contract industry.**

PCustom has evolved by specializing not only in the **production and manufacture of furnishing accessories.**

This value, added to the Know-how acquired over time, allows the company to offer the customer a 360° service. From the initial development of the project, to prototyping, to the realization and production of the project itself.

# PRODUCTION

4.

PCustom produces **furniture, upholstery and other furnishings** according to customers' requirements, in order to offer high quality **"taylor made"** products for the **residential, hotel contract and marine sectors.**

In-depth knowledge of workmanship together with the experience in this field enable the company to offer its customers **quality, flexibility, attention and care to detail.**

# MISSION

## **Handcrafted quality and industrial production.**

**PCustom** is a flexible reality organized to deal with small or large productions for every furniture need, also thanks to the synergies created with the supply chain.

Product customization and attention to details are the points of strength, in perfect harmony with Made in Italy, which is an **internationally** recognized value.

PCustom's **mission** is based on 4 cornerstone principles:

1. Research and development
2. Design and prototyping
3. Industrial production, quality craftsmanship
4. Sustainability

## Research and development

### **Constant updating and training**

PCustom's team is highly qualified, thanks to constant updating both technical and professional.

### **Researching and experimenting with new materials, processing and finishes**

The design industry is constantly evolving: great attention is paid to changes and trends in order to accommodate every need.

## Design and prototyping

PCustom is an atelier  
where dreams and designs become reality.  
We make sure the products meet  
the most stringent testing.

The stages leading up  
to prototype creation are:

1. Co-design for a Taylor Made product
2. Prototyping and engineering
3. Studies and testing with certified bodies
4. Packaging studies and analysis

## Industrial production, quality craftsmanship

Multiple years of experience in the production of furniture components and complements has allowed the company to develop, starting from an **artisan** attitude, a reality that today has grown and organized itself as a support to the design industry, to shape ideas and provide **100% Made In Italy** productions.

## Sustainability

PCustom **realizes quality products, durable over time, with a green approach towards the environment,** promotes sustainability and guarantees products made according to international standards, through responsible production processes, that protect and respect environmental, social and economic ecosystems.
